

14 August 1986

MEMORANDUM FOR THE RECORD

SUBJECT: Panama INTERNET

1. Received a call from [] this morning to advise us that Corbin, Vertex Antenna Installation Team Leader, said that he could see no way how STS could spot the equipment hut after the antenna was erected.

STAT

2. I discussed this same situation, and my own concerns, with Helmo Raag several times, the latest being Tuesday 12 August.

3. Helmo was notified of Corbin's remarks. He contacted STS who will call Corbin onsite in Panama. STS is also contacting the civil engineer who supposedly said that he could "spot" the hut after the antenna was erected.

4. Helmo later called to say that STS has again stated that the shelter can be spotted after antenna erection. I advised Helmo that it still had us concerned, but the responsibility was his, COMSATS, to ensure that the antenna or any other equipment would not be damaged.
